TachoDrive TIMER device for transport companies

using the 1-minute rule to make short drives

TachoDrive TIMER is a “timer” linked with the tachograph. It is designed for digital tachographs compliant with the “1-minute rule”. It allows the driver to make short drives without registering the driving activity in the tachograph. With the TachoDrive TIMER, the driver knows exactly when the vehicle should be stopped and switched to ⌙. As the tachograph* manufacturers claim, one can gain up to 45 minutes of additional driving time per day!

Main features:

- **compatible**
  TachoDrive TIMER is compliant with Regulation (EU) No 1266/2009 and Social Legislation in Road Transport - Guidance Note 3 (works with all digital tachographs using the „1-minute rule”:
  *SE5000 (from v7.3), 1381 (from v1.4), EFAS (from v4))
- **easy to use …**
  - intuitive high-contrast LED display
  - acoustic signalling
  - multifunction button
- **... and install**
  - only 3 wires to connect
  - all accessories included
- **modern**
  - aluminum, steel, smoked PMMA (plexiglass)
- **universal**
  - suitable for 12V and 24V installation
- **at an attractive price**

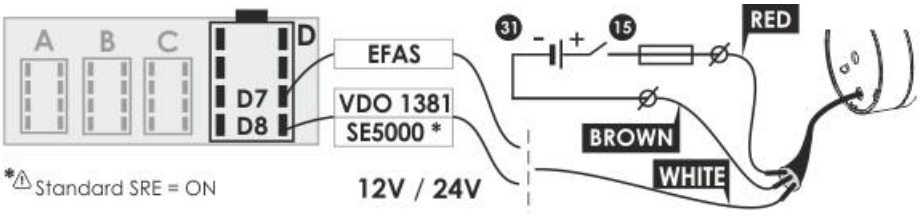

Technical data:

dimensions with grip	[mm]	45 x 50 x 55 (LxWxH)
weight	[g]	35
working temp. range	[°C]	-5 ... +55
storing temperature	[°C]	-25 ... +70
protection degree		IP-52
powering source	[V]	vehicle electrical installation 12V-24V
operating voltage	[V]	5-30V
set includes :		1 x TachoDrive TIMER 1 x grip 3 x tapping screw 4,2x13 1 x screw M4x5 1 x pad M4 1 x connector 10cm 3 x heat shrink 1 x D plug (option)
build-in DEMO mode		press and hold the SW1 button for 5s while powering
